## **Datrend Systems launches vPad-IV.**

Datrend Systems Inc. is pleased to announce the launch of their latest product, **vPad-IV**. vPad-IV is an expandable modular Infusion Device Test system that provides on-device user-managed automated testing.

Built on the highly successful vPad platform, Datrend has extended their modular concept to this product by allowing users to easily configure the system from 1 to 6 independent channels. The product features several industry firsts, including the ability to conduct up to six preventive maintenance inspections on different devices at the same time.

Ron Evans, President of Datrend Systems stated, "vPad-IV replaces Infutest 2000 which was the first product we developed 30 years ago. I am extremely proud that we were able to continue the development and launch of this revolutionary product during the Covid-19 pandemic. Initial feedback from our Dealer Network on both performance and ergonomics has exceeded expectations and resulted in a significant number of orders."

For more information on this and Datrend's other innovative products please visit the company's website at [www.datrend.com](http://www.datrend.com) or contact them directly at +1-604-291-7747.

### About Datrend Systems Inc.

Datrend Systems Inc. is a Canadian-based biomedical engineering company focused on providing solutions and leading-edge biomedical test equipment for hospitals, clinics, and medical equipment manufacturers. Since our launch in 1991, we have expanded to service the global market with innovative solutions.
